-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2622

1. The abstract of the disclosure is objected to because in line 5, “qualitative” should be changed to –quantitative—(necessary to distinguish from the qualitative measure discussed initially in the Abstract). Correction is required. See MPEP § 608.01(b).

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The scope of claim 20 is not defined because it depends from a subsequently numbered claim, and moreover, a claim that does not exist. It has been viewed as depending from claim 16.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Cugnini et al.

The system of Cugnini (noting particularly Figs. 1, 4A, 4B and 7) involves a method for displaying the status of a received channel (Figs. 4A and 4B), wherein both qualitative and

Art Unit: 2622

quantitative values are displayed per received digital television channel (col. 1 lines 7-8). During a programming operation, an indicator of signal strength and a qualitative indicator are displayed automatically upon reception of a digital television signal (noting Figs. 1 and 7), including instances when the television signal is not detected (noting the “no signal” limit in the signal quality indicator shown in Fig. 4B), thereby meeting claims 16 and 17.

As for claim 18, the signal strength provides a quantitative measure of the received signal (noting Fig. 4A).

As for claim 19, the signal quality is based on the quality of the transport stream received as a digital signal (noting Figs. 6 and 7), and the specific parameters shown in Fig. 4B are derived therefrom.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Claims 1-15 and 20 (claim 20 viewed as depending from claim 16) appear allowable over the prior art.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor R. Kostak whose telephone number is (571) 272-7348. The examiner can normally be reached on Monday - Friday from 6:30am-3:00pm.
